

Miguel Aguilera

Java Backend & Full Stack Developer

Madrid | +34 633 95 07 28 | [Portfolio](#) | aguilejan99@gmail.com | [GitHub](#) | [LinkedIn](#)

Professional Profile

Developer focused on backend and modern architectures, specialized in Java, Spring Boot, and distributed microservices-based applications. Experience developing full stack applications with Angular, TypeScript, PostgreSQL, and Docker, including event-driven systems with Apache Kafka, API Gateway, and real-time communication through Server-Sent Events (SSE). Interested in cloud computing, DevOps, REST APIs, scalable architectures, and automation through Docker containers, with fast adaptability and continuous learning oriented toward real-world projects.

Skills

Backend, APIs and Data	Frontend, DevOps and Tools
• Java, Spring Boot, Spring MVC • REST APIs, Spring Security • Microservices, API Gateway, SSE • Apache Kafka, event-driven architecture • JPA, Hibernate, Spring Data JPA • PostgreSQL, MySQL • Thymeleaf, MVC architecture • Python, OpenCV, DeepFace, Streamlit	• Angular, TypeScript, JavaScript • HTML, CSS, Bootstrap, Tailwind CSS • Responsive Design, Angular Signals • Docker, Docker Compose • Multi-service containers and networking • Cloud deployment on Render and Neon PostgreSQL • Git, GitHub, basic GitHub Actions • Postman, Maven, IntelliJ IDEA, pgAdmin

Work Experience

Aelis Consulting | 2024

- Java development and support for enterprise solutions based on Sage 200.
- Implementation of features and adaptation to professional software environments.
- Work in an enterprise context, technical collaboration, and issue resolution.

Hostal Art Madrid | 2018 - 2024

- Reservation management, customer service, and daily operational coordination.
- Communication in Spanish and English with international clients.

Education

IES Francisco de Quevedo

- Higher Vocational Degree in Web Application Development.

Languages

- Spanish - Native.
- English - Advanced.
- Japanese - Basic spoken.

Featured Projects

SmartShop Event Commerce

- E-commerce platform based on event-driven microservices with Spring Boot, Apache Kafka, PostgreSQL, and Angular.
- Real-time order processing, asynchronous communication between services, API Gateway, SSE, Docker, and a frontend connected to a distributed architecture.
- Main stack: Java, Spring Boot, Kafka, Angular, TypeScript, PostgreSQL, Docker, API Gateway, and Event-Driven Architecture.

[GitHub](#)

TaskFlow Dashboard

- Modern task management dashboard developed with Angular, TypeScript, and Tailwind CSS.
- Includes dynamic CRUD, filters, search, interactive dashboard, Dark Mode, LocalStorage persistence, and reusable components.

[GitHub](#) | [Demo](#)

DISH PLANET

- Full stack web platform for digital restaurant management with Spring Boot, PostgreSQL, Hibernate, Thymeleaf, and Spring Security.
- Includes interactive menu, orders, reservations, real-time inventory, secure authentication, demo data, and cloud deployment with Docker and Render.
